

## Oak Hub List – August 2022

### General Guidelines

- Gather acorns from Oregon White Oak after the second major drop of them from the trees, typically in early-mid September. The first drop is typically not viable.
- Gather from the drip line of the tree canopy inward. This can help assure that animals haven't chewed on them and taken them elsewhere.
- Make sure to give each tree you collect from a unique ID and keep acorns from each tree separate.
- Please fill out an intake form for each drop off.
- Questions and suggestions can be directed to Chris Serra at 503-884-6261 or [chris@livecertified.org](mailto:chris@livecertified.org).
- Enjoy some wine while at a hub and say thanks - have fun with this!

### Oak Hubs
