

# Creating Habitat in the Vineyard

## Friday, June 3

8:30am - 12:30pm

WWCC Center of Enology & Viticulture Center  
(Walla Walla Campus)  
500 Tausick Way  
Walla Walla, WA 99362

Learn the nuts and bolts of creating habitat in your vineyard, farm or backyard.

Presentations will focus on the role of beneficial insects in the vineyard for pest prevention and how native plants can create a beautiful and inviting space for your employees and the public. We will spend time in the field looking at habitat plantings and scouting for insects.
